

Flat suction pads Series VSCF

New

Universal suction pads in NBR or Silicone.

Diameters from 1 to 100 mm with thread size M3, M5, G1/8, G1/4, both male and female.

SERIES VSCF FLAT SUCTION PADS

- » Low profile, with reduced intrinsic volume which enables very short cycle times.
- » Compact design for good resistance to transversal forces, enhancing the stability of the piece.
- » Negligible movement of the piece during suction phase.

Series VSCF flat suction pads consist of a nipple and rubber part which are delivered assembled. Both components can be ordered separately as spare parts. From diameter 60 mm and up a mounting plate is vulcanised into the rubber part to which the nipple should be mounted.

These suction pads are generally used for handling objects with smooth or slightly curved surfaces such as sheet metals, extruded profiles, cardboard boxes, glass plates, plastic components, wood panels etc.

Applications:

- Handling of parts with flat or slightly curved surfaces like sheet metal for car body workshops, tubes, cardboard boxes, etc.
- Silicone version for the handling of parts at high temperatures

GENERAL DATA

Description	robust hard-wearing suction pads consisting of suction pad VSCF and connection nipple
Construction	- nipples and suction pads are supplied not assembled - diameters of 60 mm and more: nipple screwed into supporting plate vulcanised to the pad
Maintenance	it is possible to replace the soft element
Working temperature	NBR version: -30°C ÷ +120°C (for short time <30 sec.); -10°C ÷ +70°C (long-term) SILICONE version: -50°C ÷ +220°C (for short time <30 sec.); -30°C ÷ +180°C (long-term)

TECHNICAL DATA

Mod./Diameter	Suction force (N)*	Int. volume (cm ³)	Min. convex curvature radius (mm)	Internal tube diameter (mm)
